

# Exclusive Fountains

## Small floating fountain

How do you install a fountain in a lake or large pool do you have to drain it? The answer is no, have an EF-PJ floating fountain

To the left is the EF-PJ which can have three 50 watt "**Lunaqua 10**" lights fitted as an optional extra.

To the right is the EF-PJ working with 3 white lunaqua 10 lights

Birds eye view of the EF-PJ floating fountain actually working

You can also use coloured filters on the lights. This one is only using red, green and blue filters

Here is the EF- PJ floating fountain

With its normal jet (as shown) the maximum jet height is 3M high, with a 3M spread. It is also possible to use almost any 1 inch nozzle

This is an EF-PJ It is the **ONLY** 230v floating fountain we supply
