

Exclusive Fountains

Large pool / pond nozzles

If you have a large pool or pond you will want a large fountain jet to suit. We have taken these pictures to give you an idea of what a large nozzle operating looks like, unfortunately we do not have a big enough pool to show "the whole effect"

Please also be aware of the [JW rule](#)

In all pictures an EFN 450 pump was used

Measurements are approximate and will vary according to pump used

You can of course have more than one nozzle in a pool

Lights can also be used for an additional effect

Schaumsprudler 35-10e nozzle.

It is a foaming jet which reaches approximately 3m in height

Level independent

Geiser 20T nozzle

It is a frothy jet which reaches approximately 3m in height

Level dependant

Komet 10 - 14T

Its single 14mm diameter jet reaches 5.5 m (we could not fit it all in)

Level independent

Vulkan 37-25 K

It is the "traditional" nozzle with is 37 single jets

It reaches 4m high with a spread of 4 m

Level independent
